EDUCATION

Vasavi College of Engineering	<i>2023 - 2027</i>
Bachelor of Engineering in Information Technology	CGPA: 9.10
Sri Chaitanya Junior Kalasala	<i>2021 - 2023</i>
Intermediate	Percentage: 97.2

EXPERIENCE

Artificial Intelligence Intern , Adverk Education	<i>August 2024 - October 2024</i>
- Built and trained a machine learning model to predict car prices based on various features (see Project section) - Gained hands-on experience with regression algorithms, data cleaning, and model evaluation using scikit-learn and Python - Learned practical applications of AI in real-world business contexts	

PROJECTS

Car Price Prediction System , Adverk Education	<i>August 2024- October 2024</i>
<i>Developed during AI Internship at Adverk Education</i> Implemented a machine learning model using Python, Pandas, scikit-learn, and Matplotlib to predict car prices based on features like brand and kilometers driven.	
AI-Powered PDF Chatbot	<i>July 2025</i>
Developed a chatbot to query PDFs using Streamlit, LangChain, HuggingFace Embeddings, Chroma Vector Store, and PyPDF2/pdfplumber for contextual QA.	
Weather Web Page	<i>July 2025</i>
Created a basic weather info web page using HTML, CSS, JavaScript, and OpenWeatherMap API that fetches and displays live weather based on user-input city.	
Hostel Management System (Mini Project)	<i>December 2024</i>
Developed a Python-based hostel management system using JSON data to manage room allocations, track occupancy status, and visualize hostel infrastructure across multiple floors and hostels.	
Automatic Timetable Generator	<i>April 2025</i>
Implemented in C using graph coloring and backtracking to automatically generate clash-free college timetables across multiple sections under scheduling constraints.	

ACTIVITIES

GenAI Bootcamp Hackathon Participant , FutureSkills Prime	<i>March 2025</i>
Completed a 4-day bootcamp on Generative AI tools and techniques, followed by a 2-day hackathon. Developed an AI-powered Meal Planner that generated personalized meal plans using prompt engineering and language model integration. Contributed to ideation, development, and testing.	

SKILLS

Programming Languages: C, Python, Java, JavaScript

Web Development: HTML, CSS, React.js, Bootstrap, Spring Boot

Libraries/Frameworks: NumPy, Matplotlib

Databases: MySQL

Computer Science Fundamentals: Data Structures and Algorithms, Object-Oriented Programming (OOP)

CERTIFICATIONS

The Joy of Computing Using Python , NPTEL (IIT)

Jul – Oct 2024

Completed a 12-week course with a consolidated score of 83

Problem Solving (Basic) , HackerRank

July 2024

Earned certification demonstrating fundamental algorithmic and logic-building skills.

Python (Basic), HackerRank

June 2024

Certified for understanding of Python syntax, data types, and basic programming constructs.
